Article Index

ATP-Dependent Ca^{2+} Transport in Microsomes Isolated from Rat Liver, Inhibition by Orthovanadate of, 167
ATP-Driven Membrane Potential in Beef Heart Mitochondrial H^+-ATPase: A Study Using the Voltage-Sensitive Probe Oxonol VI, Effects of Cd^{2+} on, 225
Ca^{2+}-ATPase from Sarcoplasmic Reticulum by Nonionic Detergents, Binding, Activation, and Solubilization of the, 181
Ca^{2+}-Flux Modulation by Calciductin Phosphorylation in Cardiac Sarcolemma, 109
Calcium Release Channel of Skeletal Sarcoplasmic Reticulum, Solubilization and Reconstitution of the, 327
Cardiac Sarcoplasmic Reticulum Calcium Pump, Role of Phospholamban in Regulating, 119
Dibromothymoquinone Effect of Membrane Potential Generation in *Rhodospirillum rubrum* Chromatophores, The, 77
H^+-ATPase Complex from Beef Heart Mitochondria, Resolution and Reconstitution of, 309
Hormonal and Neurotransmitter Regulation of Ca^{++} Influx Through Voltage-Dependent Slow Channels in Cardiac Muscle Membrane, 131
Interfacial Potentials Induced by Carbonylcyanide Phenylhydrazone Uncouplers: Possible Role in Inhibition of Mitochondrial Oxygen Consumption and Other Transport Processes, Changes in, 243
L-Arginine Uptake by Rat Renal Brush Border Membrane Vesicles, A Sodium-Independent Mechanism for, 1
Melibiose Carrier of *Escherichia coli,* Reconstitution of the, 269
Membrane Structural Alterations in Malignant and Normal Avian Lymphocytes: A Raman Investigation, 97
Monomeric and Oligomeric Soybean Agglutinins with Pig Lymphocytes and Plasma Membranes, Interaction of, 19
Protein Synthesis and Leucine Transport by Yeast Mitochondria, Effect of Temperature on, 291
Solubilized Opiate Receptors from Human Placenta, Characterization of, 35

Synaptosomal Membrane Calcium Monitored by Chlorotetracycline Fluorescence, Depolarization-Induced Increase in, 209
Trypsin Digestion Exposes a Channel in the Sarcoplasmic Reticulum Membrane, Evidence that, 49
UDP Glucuronosyltransferase and Other Microsomal Drug-Metabolizing Enzymes, Effect of Different Detergent Systems on the Molecular Size of, 193
